

**Position:**

## Network Engineering Manager

**Location:**

218 Lincoln St, Allston, MA

**Start date:**

Immediately

**About Us:**

**netBlazr** provides affordable, high-speed internet to residences and businesses in Boston as an alternative to the "big guys" that force people into high-cost service bundles for things they don't want. netBlazr was a finalist in the MassChallenge, a MITX Innovation Award Winner, selected Boston Globe "Game Changer", and is Boston's only 5-star rated ISP on yelp.

**Position Overview:**

We seek a proven Network Engineer to lead our growing engineering team. This is a position for a person who wants to make an impact, not just a living. We're looking for a confident, self-reliant technical leader to battle-test our existing network and to design and implement our next generation network to optimize performance, security, and low cost operations. We need a team leader who will excel at architecting our pseudo-mesh network, while monitoring and optimizing a rapidly changing Fixed-Point Wireless network with thousands of routers.

**Qualifications:**

- 5+ years proven success running a growing, carrier-grade switched network.
- Strong desire to run a growing network and make an impact in served communities.
- 2+ years of success managing engineering teams in a network operating environment.
- Great programming skills, comfortable scripting to manage a network with thousands of routers.
- Solid understanding of OSPF, BGP, and other routing algorithms.
- Analytical mindset, capable of writing data-collection software, analyzing results, making changes, iterating.
- Knowledge of wireless security, VPNs, and performance/implementation of alternative encryption suites.
- Cisco-certified Design Expert (CCDE), or equivalent network design, performance engineering experience.
- Experience with RADIUS and other AAA solutions.
- Linux guru.
- Great attitude – able to laugh under pressure.

**To Apply:**

Please send resume to [recruiting@netblazr.com](mailto:recruiting@netblazr.com) with "**Network Engineering Manager**" in subject line. We can only respond to candidates who meet minimum qualifications. netBlazr is an Equal Opportunity Employer.
